PROFESSIONAL SUMMARY

AI & ML Engineer with hands-on experience in machine learning, deep learning, and production-grade Agentic AI. Builds end-to-end systems from training and evaluating ML models on real-world data to deploying multi-agent LLM pipelines on GCP and Kubernetes. Focused on going beyond prototypes: reproducible MLOps, LLM evaluation, and observability built in from the start.

TECHNICAL SKILLS

AI Agents & Frameworks: LangChain, LangGraph, LangSmith, Deep Agents, Model Context Protocol (MCP) Servers, Ollama, OpenAI, Anthropic, Gemini, HuggingFace, Claude Code, Pi Agent, n8n

Core ML & Generative AI: Large Language Models (LLMs), Generative AI, RAG (Retrieval-Augmented Generation), Fine-tuning, LLM Evaluation, Context Engineering, Python, PyTorch, TensorFlow, Scikit-learn, LightGBM, NLP, CNNs

MLOps & Cloud: CI/CD, Docker, Kubernetes (GKE), MLflow, DVC, Jenkins, GitHub Actions, GitLab CI/CD, Argo CD, SonarQube, Trivy, Prometheus, Grafana, GCP (Cloud Run, GKE, Artifact Registry), AWS (EC2, ECS)

Backend, Data & Databases: FastAPI, Flask, Pydantic, REST APIs, Streamlit, Vector Database, ChromaDB, FAISS, AstraDB, SQLite, PostgreSQL, NumPy, Pandas, EDA, Feature Engineering, OpenCV, Data Structures & Algorithms

EXPERIENCE

Infosys Springboard 5.0 · Oct 2024 – Dec 2024

AI/ML Engineer Intern · Remote

- Built multilingual NLP language detection system across 29 languages, benchmarked Logistic Regression (78%), LSTM (91%), GRU (90.05%); selected GRU as production model for superior speed and optimization efficiency.
- Achieved 95%+ accuracy on linguistically distinct scripts (Chinese, Japanese, Malayalam, Tamil); owned full ML lifecycle EDA, feature engineering, model training, evaluation, CI/CD documentation.

KEY PROJECTS

Multi-AI Agent System - LangGraph, Groq, FastAPI, GCP Cloud Run, CI/CD, Jenkins 2026

- Designed production multi-agent Generative AI app with custom LangGraph StateGraph dynamic tool routing, real-time streaming, and RAG to reduce hallucination risk.
- Deployed to GCP Cloud Run via Jenkins CI/CD with static code analysis; achieved sub-second response latency through async FastAPI optimization.

Paytm Local MCP Server - MCP, LangGraph, LangChain, Prompt Engineering, SQLite, Pydantic 2025

- Built privacy-first offline MCP server with 6 structured tools for natural language querying of 1,000+ UPI transactions full Excel → JSON → SQLite pipeline, zero cloud dependency.
- Custom LangGraph + LangChain chat client with Prompt Engineering makes the system host-agnostic runs on Claude Desktop, terminal, or any MCP-compatible host without modification.

AI Tutor Screener - LangGraph, FastAPI, Whisper, LLMs, REST APIs, Render 2026

- Built AI-powered interview assessment agent with dual-track voice + text input, structured evaluation reports, and admin dashboard fully deployed to Render via CI/CD.
- LangGraph state machine drives multi-turn assessment flow auto-scoring student responses and generating structured competency reports per session.

Medical RAG AI Agent - RAG, Vector Database, FAISS, Flask, GCP Cloud Run, CI/CD 2026

- Healthcare chatbot with Vector Database retrieval and mandatory source citations on every response no answer returned without a grounded reference.
- Trivy container security scanning integrated into Jenkins CI/CD vulnerabilities caught pre-production on every deployment.

Flight Satisfaction MLOps Pipeline - LightGBM, MLflow, DVC, Docker, CI/CD, Jenkins 2024

- Architected end-to-end MLOps pipeline data ingestion through containerized inference with MLflow experiment tracking and DVC data versioning for full reproducibility.
- Automated training, validation, and deployment via CI/CD (Jenkins); containerized inference service ready for horizontal scaling.

EDUCATION

Chandigarh University · Punjab, India

B.E. in Computer Science Engineering · 2022 - May 2026
